

PROFESSIONAL SUMMARY

Analytical and detail-oriented 3rd-year Informatics student at TUT with demonstrated experience in business analysis, process mapping and data-driven problem solving. Proficient in Power BI, SQL and Microsoft Excel for reporting and documentation. Independently conducted real-world BA projects including stakeholder research, AS-IS/TO-BE process mapping and formal proposal writing that achieved measurable institutional outcomes. Strong communicator with a customer-service mindset and eagerness to learn new systems and tools including DMS platforms. Actively seeking an Internship opportunity where I can apply analytical thinking and structured problem solving that delivers immediate value.

CORE COMPETENCIES

- Process Mapping & Documentation (AS-IS/TO-BE, BPMN)
- Requirements Gathering & Stakeholder Engagement
- Power BI Dashboards & SQL Reporting
- Gap Analysis & Compliance Research
- Business Case Writing & Formal Proposal Authoring
- Microsoft Excel (Advanced — Dashboards & Automation)
- Analytical Problem Solving & Decision Support
- Python (Pandas, NumPy, Matplotlib, Scikit-learn)

BUSINESS ANALYSIS PROJECTS

GlobalLink Logistics: Operational Bottleneck Report

June 2026

Tools: Power BI · Pareto Analysis · Process Visualization · Requirement Documentation

- Identified and visualized systemic operational losses by performing a Pareto analysis on station-based rework costs.
- Mapped current operational workflows to isolate critical bottlenecks and quantified process inefficiencies that contributed to significant operational waste.
- Developed a series of Power BI visualizations to communicate process gaps to stakeholders, resulting in a data-driven proposal for process optimization projected to save over R9,500 annually

Campus Student Marketplace — Student Online Mall

May 2026

Tools: Stakeholder Interviews · AS-IS/TO-BE Mapping · BPMN · Requirements Documentation · Figma

- Conducted stakeholder interviews and ethnographic buyer research to map a complete 8-step AS-IS purchase journey, identifying manual payment setup as the critical friction point causing transaction drop-offs
- Documented full functional and non-functional requirements using industry-standard BA methodology including FR and NFR classification
- Designed TO-BE solution — Student Online Mall — projecting 60% reduction in checkout time through QR-code payment integration and automated appointment scheduling
- Produced BPMN process diagram, requirements specification and 5-screen Figma prototype as formal deliverables

Institutional Policy Gap Analysis — Universal Residence Storage

Apr – May 2026

Tools: Policy Document Analysis · Gap Analysis · Formal Proposal Writing · Stakeholder Engagement

- Conducted deep-dive audit of TUT Residence Rules identifying Rule 8.7/5.13.6 — a compliance gap where institutional policy explicitly permitted storage but administration was ignoring it
- Authored a formal evidence-based proposal including an interim measure strategy that lowered institutional risk threshold for approval
- Navigated a multi-level governance structure independently — engaging Residence Committee, SRC and HOD Accommodation through proper channels
- Outcome: Storage was reinstated for affected students following formal submission of the proposal

DATA ANALYSIS PROJECTS

Bank Customer Churn Prediction

2025

Tools: Python · Scikit-learn · SMOTE · Random Forest · Logistic Regression

- Built and compared Logistic Regression (74%) and Random Forest (81%) classifiers with SMOTE oversampling and threshold tuning
- Engineered derived features — balance-to-salary ratio and products-per-tenure — capturing behavioral patterns not visible in raw data
- Developed custom churn risk scoring function producing Low/Medium/High business-interpretable risk categories with actionable retention recommendations

Retail Sales Dashboard

2025

Tools: Power BI · SQL · Advanced Excel

- Designed end-to-end Power BI dashboard tracking R456K in revenue across 1,000 transactions segmented by age, gender and product category
- Automated monthly revenue forecasting using Excel trend analysis reducing manual reporting time by an estimated 40%
- Translated data findings into 3 actionable business recommendations presented as a mock stakeholder briefing

EDUCATION

Diploma in Informatics Tshwane University of Technology (TUT), Pretoria Focus: Business Analysis · Database Management · Human-Computer Interaction	Jan 2024 – Present
---	---------------------------

National Senior Certificate (Matric)

Magaedisha Secondary School, Polokwane

2023
